

SYNTHESIS[®] LINE

battente

Synthesis[®] Line battente is ECLISSE solution that allows installing a hinged door flushing with the wall, this means a door with no frame: no jambs, no architraves.

According to your taste, the doors can be painted in the same colour of the wall, perfectly hiding from view, and blending in with the rest of the wall as much as possible in the pursuit of total continuity and formal rigor.

Alternatively, the door panel can be lacquered or decorated with finishing or prints that play them up, becoming real design elements.

SYNTESIS® LINE

battente

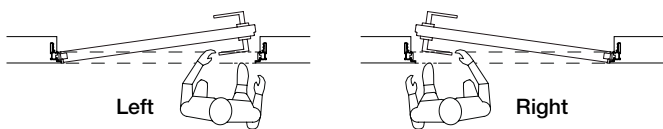

The same aesthetic and structural characteristics are present in the frameless sliding pocket door systems Syntesis® Line and Syntesis® Luce. Matching both solutions together, sliding and hinged, you can get a perfectly coherent and minimal result.

SYNTESIS® LINE

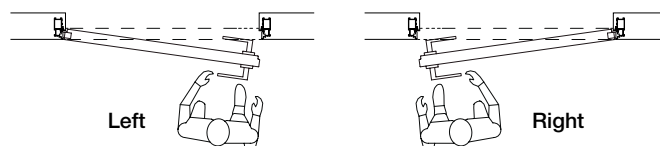

battente

TYPE: CHOOSE THE OPENING

PUSH DOOR

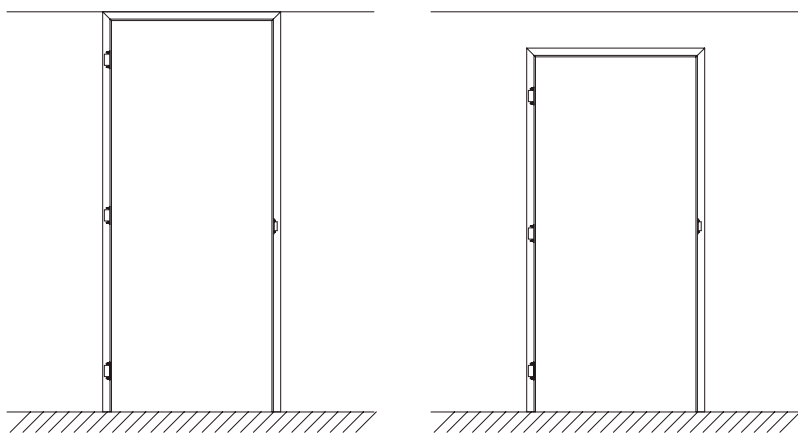

PULL DOOR

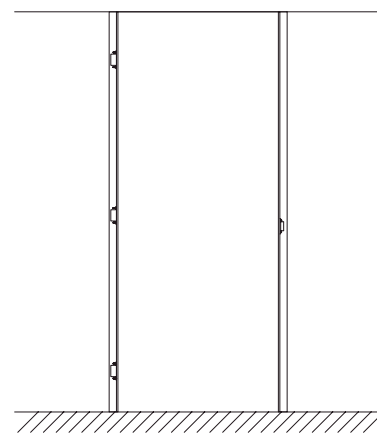

VERSION: WITH OR WITHOUT HEADER

The distinctive feature of Syntesis® Line battente is the possibility to install the doors flush with the ceiling with or without header in order to achieve a total integration among door, wall and ceiling.

With header

Without header

SUPPLY METHODS

COMPLETE SET

SINGLE ELEMENTS

The complete SET supply includes frame structure, door and hardware.

SYNTESIS® LINE

battente - THE ALUMINIUM FRAME

THE ADVANTAGES

- UNIQUE frame, for both stud and solid wall.
- Supplied in kit or pre-assembled with spacer panel in OSB 3, 25 mm thick in order to guarantee a perfect squaring of the frame (see point 7).
- Supplied with a plastic protection to avoid dirt and scratches in construction site.
- Bar code on the frame to identify the product.
- Door seal applicable on the frame, not on the door. Stable, easy to install, soft and aesthetically pleasant.
- Cover for door hinge to protect hinges from plaster (pull version).

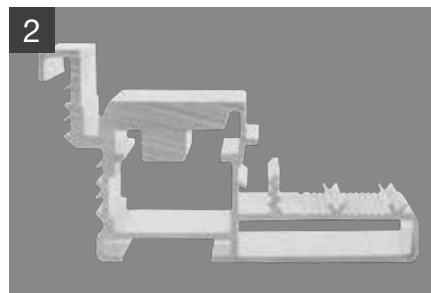

Trademark

The frame is recognisable thanks to the trademark.

Very strong frame

The frame profile weighs about 2 kg/m.

Long lasting

The aluminium frame is firstly subjected to a phosphate treatment against oxidation and then it is primer-coated to facilitate paint cohesion.

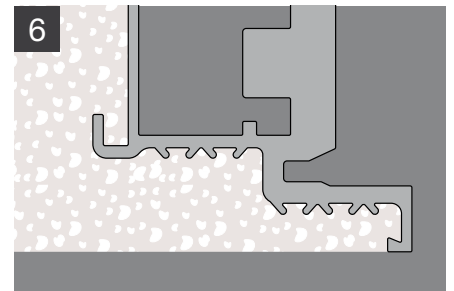

6 adjustable clamps

The clamps are adjustable for height and prepared to be easily fixed to solid wall.

Quote 100

To help the installer finding the "0" quote.

NO cracks!

The frame profile is specially designed to avoid cracks.

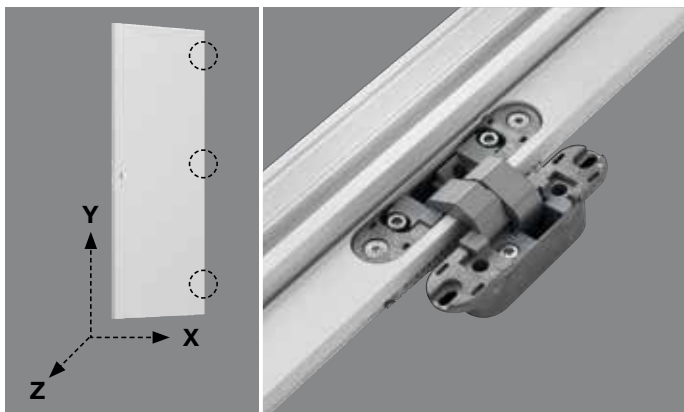

SYNTHESIS® LINE

battente - THE DOOR

THE ADVANTAGES

- The door is recognisable thanks to the trademark
- Primer-coated to favour cohesion of wall paint and lacquer (both opaque and glossy)
- Universal outline adaptable to opening side (right or left)
- 45 mm thickness
- Full hollow core with double solid wood perimeter to improve inflexibility
- Border all along the perimeter
- Door panel with height starting from H 2300 mm, are provided with a tensioning rod that improve the door flatness
- The door panel is supplied only with a hole for handle; it's possible to install key lock or turn knob lock creating a second hole during installation.

HINGES

3 Triple adjustable hinges (height, width, depth) for a perfect calibration of the perimeter size.

Note: when the door weighs more than 50 kg (max 65 kg), 4 hinges are needed (increase t 60,00).

MAGNETIC LOCK

Magnetic lock

It has modern design and minimal lines; it remains "flush" and guarantees an extraordinary softness while closing.

Eccentric strike plate

- Minimal design, it remains "flush"
- Eccentric: it allows fixing little installation imperfections, guaranteeing a perfect locking.

Note: it comes standard without lock or lock with key. Turn knob lock on request.

SYNTESIS® LINE

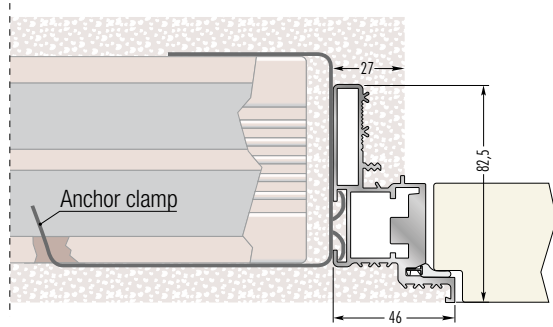

battente - APPLICATIONS

The frame fits both with stud and solid wall.

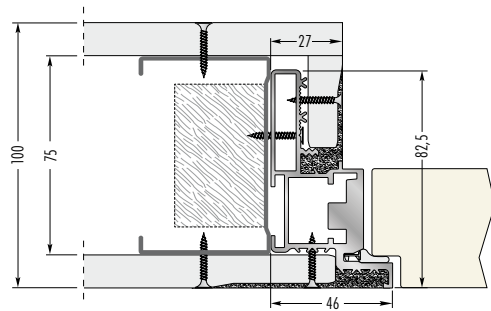

For solid wall 6 clamps are cemented in the special spaces created in the wall.

For stud wall the frame is fixed with screws to the metal structure through the existing holes.

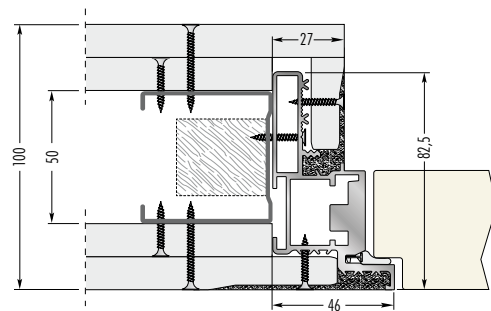

PUSH DOOR

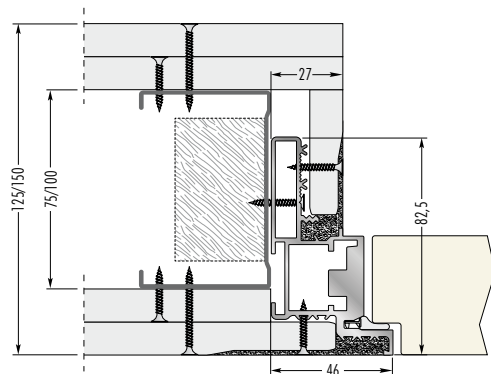

Frame on solid wall

Frame on stud wall with one plate
Finished wall thickness 100 mm

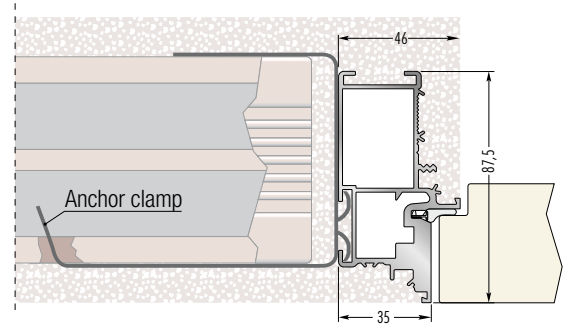

Frame on stud wall with two plates
Finished wall thickness 100 mm

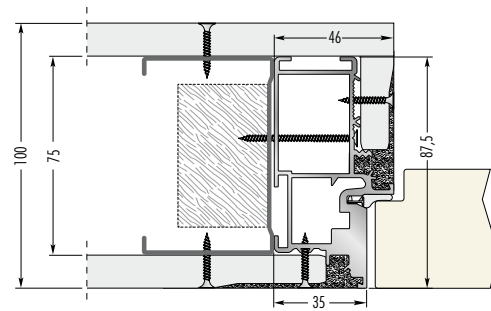

Frame on stud wall with three plates
Finished wall thickness 125/150 mm

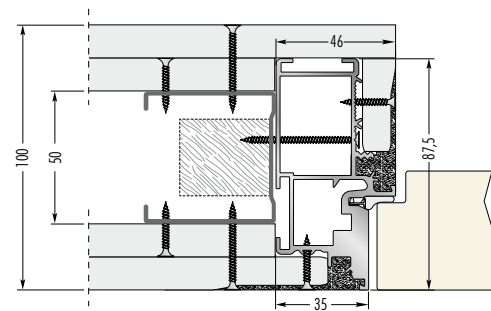

PULL DOOR

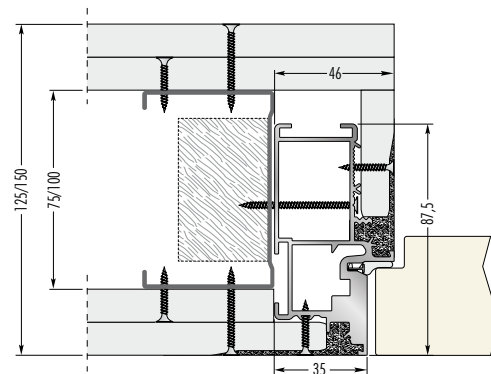

Frame on solid wall

Frame on stud wall with one plate
Finished wall thickness 100 mm

Frame on stud wall with two plates
Finished wall thickness 100 mm

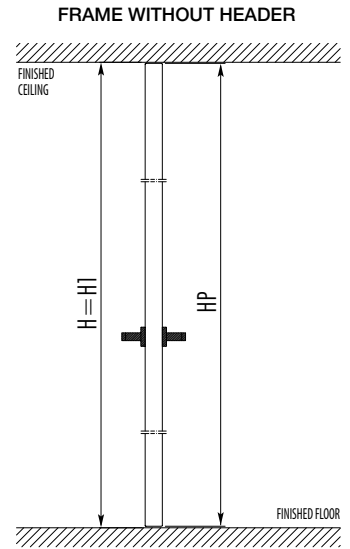

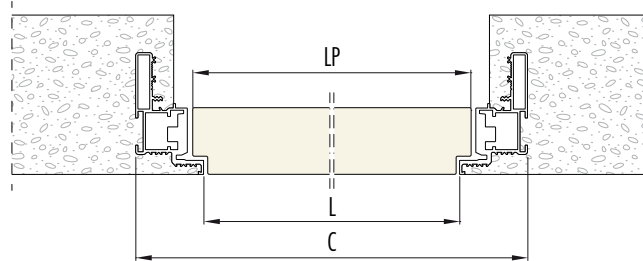

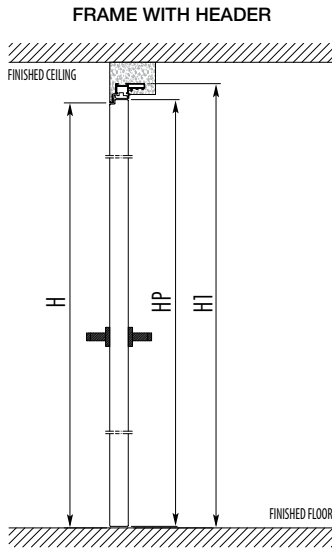

Frame on stud wall with three plates
Finished wall thickness 125/150 mm

Total integration with the wall: the construction details are designed to ensure the perfect adhesion of the finishing material. The frame becomes one with the wall.
There is, but you do not see it.

Aesthetics

The typical structural strength of Eclisse frames is increased to avoid any change along the line of the door hole and to meet the request of non-standard dimensions.

Strength

Eclisse has always studied every detail of its products, for proving them easy to install and long-lasting.
Only the best ideas become projects that turn into benefits!

Ease of installation
